Mt Cobb System May Be At Increased Risk From Microbial Contamination

December 10, 2023: Aqua Pennsylvania has issued a boil water advisory for the Mt Cobb water system due to a water main break which caused a loss of positive pressure in the distribution system. Aqua customers in this system are advised to use boiled or bottled water for drinking, making ice, brushing teeth, washing dishes and food preparation until further notice. You will be notified when this advisory is lifted.

What should I do?

• **DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST.** Bring all water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and food preparation until further notice. Boiling kills bacteria and other organisms in the water.

• **Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.**

• The symptoms above are not caused only by organisms in drinking water, but also by other factors. If you experience any of these symptoms and they persist, you might want to seek medical advice. People at increased risk should seek advice about drinking water from their health care providers.

What happened? What is being done? When will the problem be corrected?

On December 10, a main break caused a loss of positive pressure in the distribution system. As a precaution, Aqua Pennsylvania has issued a boil water advisory for customers in the Mt Cobb water system. Aqua is in the process of remedying the water main break and collecting additional water samples.

Until satisfactory bacteriological sample results are received from the laboratory, Aqua customers are advised to use boiled or bottled water for drinking, making ice, brushing teeth, washing dishes and food preparation until further notice, which would be no sooner than December 12, 2023.

General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 800.426.4791.

Boil Water Advisory response information for retail grocery and food establishment is available here: [https://www.农业. gov/consumer_protection/FoodSafety/Pages/Emergency-Response.aspx](https://www.农业. gov/consumer_protection/FoodSafety/Pages/Emergency-Response.aspx)

**Please share this information with all the other people who drink this water, especially those who may not have received this notice directly** (for example, people in apartments, nursing homes, schools, and businesses). **You can do this by posting this notice in a public place or distributing copies by hand or mail.**
